2	Propose a solution to address the inconsistent experiences across channels. Your proposal should include technical architecture, data flow design, customer journey mapping, integration milestones, and success metrics and KPIs.	15	CO4
1	Develop a comprehensive strategy to improve retention for the two segments with the highest churn rates. Detail segment-specific initiatives, resource allocation plans, success metrics and monitoring framework, and expected ROI calculations.	15	CO4
	<ul> <li>showing its age. The current CRM platform, implemented eight years ago, struggles to meet modern retail demands. While the system maintains partial integration across channels, its analytical capabilities are limited to basic reporting. The company's mobile app, despite its potential, has only achieved a 35% adoption rate among the customer base.</li> <li>In response to these challenges, TechVision has launched two major initiatives. Six months ago, the company invested \$2 million in revamping its loyalty program, which has achieved a 28% adoption rate and delivered a modest 1.2x ROI. Additionally, a customer service chatbot was implemented at a cost of \$800,000. While the chatbot manages a 45% resolution rate, customer satisfaction with this service remains lukewarm at 3.2 out of 5.</li> </ul>		
	<b>Technology Infrastructure and Recent Initiatives</b> The backbone of TechVision's customer relationship management is		
	support emerged as the primary concern, with 45% of respondents expressing dissatisfaction. The challenge of maintaining consistent experiences across different shopping channels was highlighted by 38% of customers. Response time to customer queries was flagged by 32% of respondents as problematic. Additionally, 28% of customers felt the lack of personalized recommendations hindered their shopping experience, while 25% questioned the value proposition of the current loyalty program.
