

TABLE OF CONTENTS

Sr. No.	TITLE	Page No.
	DECLARATION	iii
	THESIS COMPLETION CERTIFICATE	iv
	ACKNOWLEDGEMENTS	v
	EXECUTIVE SUMMARY	vi
	TABLE OF CONTENTS	xi
	LIST OF FIGURES	xiv
	LIST OF TABLES	xvi
	ABBREVIATIONS	xviii
Chapter 1	Introduction	
1.1	General	1
1.2	Ionizing Radiation and Its Sources	2
1.3	Applications of Ionizing Radiations	4
1.3.1	Industrial Radiography Practice	5
1.4	Health Hazard Associated with the Ionizing Radiation	7
1.5	Motivation for the Research	7
1.6	Research Objectives and Scope	8
1.7	An Overview of the Research Model	10
1.8	Chapters Scheme	14
Chapter 2	Literature Review	
2.1	General	17
2.2	Prospective Risk Assessment in the Use of Radiation Sources	18
2.3	Risk Assessment in the Non-Nuclear Applications of Radiation Sources	20
2.4	Identification of Research Gaps	27
2.5	International Guidelines for Risk Assessment Studies of Radiation Facilities	29
2.6	Chapter Summary	31
Chapter 3	Industrial Radiography Practice in India	
3.1	General	32
3.2	Current Status and Trends in Industrial Radiography Practice in India	34
3.3	Occupational Workers in Industrial Radiography	38
3.4	Accidents Initiators in Industrial Radiography	39
3.5	Chapter Summary	39

Chapter 4 Design Analysis & Risk Assessment of Industrial Gamma Radiography Exposure Devices

4.1	Industrial Gamma Radiography Exposure Device	41
4.2	Design Analysis of the Industrial Gamma Radiography Exposure Devices	43
4.2.1	Source Housing	43
4.2.2	Remote Control Unit	44
4.2.3	Guide Tube Assembly	45
4.2.4	Source Assembly	47
4.2.5	Operation of the IGRED	49
4.3	Analysis of Safety Features and Interlocks in the IGRED	49
4.4	Safety Assessment of Radiography Devices	51
4.4.1	History of the Radiography Devices in India	51
4.4.2	Safety Assessment of The IGRED at Various Stages	52
4.4.3	Requirement for Design Based Risk Assessment	57
4.5	FMEA Methodology for Risk Assessment	58
4.5.1	Introduction and Objectives of FMEA Methodology	60
4.5.2	Steps for FMEA Study	61
4.6	Risk Assessment of IGREDs using FMEA	65
4.6.1	FMEA Team Constitution	65
4.6.2	Component Failure Identification	66
4.6.3	Data Generation for Failure Occurrence (O), Severity (D) and Detection (D)	67
4.6.4	Occurrence, Detection and Severity Ranking	68
4.7	FMEA Results	73
4.8	Result Analysis and Discussion	79
4.9	Recommendations	82
4.10	Scope of the Technique and the Research Work	87
4.11	Chapter Summary	88

Chapter 5 Operational Aspects & Instruments Reliability Assessment in Industrial Radiography Practice

5.1	Operational Aspects of Industrial Gamma Radiography Exposure Device	90
5.1.1	Dose Limits	91
5.1.2	Radiation Monitoring Instruments	92
5.2	Probabilistic Safety Assessment	94
5.2.1	Fault Tree & Event Tree in PSA	95
5.3	Reliability Assessment for Radiation Monitoring Instruments	97
5.3.1	Fault Tree Analysis	99
5.3.2	Reliability Assessment Results	102
5.4	Operating Scenarios in Industrial Radiography Practice	104
5.4.1	Standard Operating Procedure for Open Field Radiography Operations	105
5.4.2	Standard Operating Procedure for Enclosed Radiography Operations	107
5.4.3	SOP for Risk Assessment Study	108

5.5	Common Reported Incidents in Industrial Radiography Practice	112
5.6	Chapter Summary	112
Chapter 6	Operational Risk Assessment in Industrial Radiography Practice	
6.1	Operational Risk Assessment	115
6.1.1	Concept of “Potential Exposure”	117
6.2	Risk Assessment Modeling	118
6.2.1	Scenario Development for Risk Assessment	118
6.3	Data Generation for Risk Assessment Modeling	119
6.3.1	Delphi Survey	120
6.4	Probabilistic Safety Assessment in Industrial Radiography Practice	126
6.4.1	Categorization of Resultant Radiation Exposure	126
6.4.2	Event Tree Assessment	128
6.5	Result Analysis and Discussion	132
6.6	Recommendations	135
6.7	Challenges for the Research Work	138
6.8	Chapter Summary	139
Chapter 7	Conclusion and Future Work	
7.1	Summary and Conclusion	142
7.2	Limitations of the Study	147
7.3	Scope for Future Work	148
	REFERENCES	150
	APPENDIX A	157
	APPENDIX B	158
	APPENDIX C	161
	BIOGRAPHICAL SKETCH OF THE AUTHOR	163
