	SECTION-D (15*2=30MARKS)		
S.No.	Read the following case and the questions that follow	Marks	СО
	Case study – Dell Starts Listening		
	Dell Computer has always been America's darling with its high-quality equipment,		
	direct distribution model, and great customer service. Yet, in June 2005, Dell was		
	brought to its knees by a single blogger-Jeff Jarvis of BuzzMachine.com:		
	"I just got a new Dell laptop and paid a fortune for the four-year, in-home		
	service The machine is a lemon and the service is a lieDELL SUCKS. DELL		
	LIES. Put that in your Google and smoke it, Dell."		
	This post brought a hailstorm of similar customer service complaints that lasted		
	for nearly 2 years, and this issue has come to be known as "Dell's Hell." What		
	happened?		
	Wanting to pare costs, Dell followed a current trend and outsourced its		
	technical customer service to a firm in India in the early 2000s. Things looked great		
	as costs dropped and market share increased to 28.8 percent the following year (2004),		
	according to the global market intelligence firm IDC. However, complaints about the		
	customer service also increased: Better Business Bureau complaints rose by 23 percent		
	and Dell's customer satisfaction declined by 6.3 percent, according to a University of		
	Michigan survey. A 2005 Google search for "Dell customer service problems"		
	returned nearly 3 million links. Clearly, the outsourcing strategy was not having the		
	desired effect.		
	Like many companies, Dell decided to sit tight for a year and wait for the online		
	complaint storm to pass. When it did not stop, Dell appointed a digital media manager		
	to "deal" with the internet chatter. Lionel Menchaca initiated several Dell blogs in		
	multiple languages as mechanisms for handling customer complaints and ideas, and to		

	have conversations with stakeholders about the problems and Dell's actions to fix		
	them. IdeaStorm.com is a notable blog and social medium where users post ideas and		
	vote on them, with the best percolating to the top. Dell responds to the ideas, makes		
	changes in the company, and reports on the progress. In the first 3 months, IdeaStorm		
	gathered 5,000 ideas, over 20,000 comments, and more than 350,000 idea		
	endorsements. These resulted in over 20 changes in the company.		
Q1	Identify several ways that Dell could engage customers in a positive way, using techniques of earned media management.	15	2 & 3
Q2	What might Dell have done to manage its online reputation better? Acting as Dell's		
	consultant, give the company advice that would keep it out of this kind of trouble in	15	3 & 4
	the future.
