Program: BBA (FAS/FT/AVO)
Subject/Course: Consumer Behaviour & Market Research
Course Code: MKTG 2002

Semester: IV
Max. Marks: 100
Duration: 3 Hours

IMPORTANT INSTRUCTIONS

- 1. The student must write his/her name and enrolment no. in the space designated above.
- 2. The questions have to be answered in this MS Word document.
- 3. After attempting the questions in this document, the student has to upload this MS Word document on Blackboard.

	Attempt any <u>FIVE</u> Questions.	Marks	COs
Q1	With the help of suitable examples, explain the following statements: (a) Understanding consumer behaviour is the prerequisite for framing effective marketing strategies. (b) Marketers must monitor the stage of family in family lifecycle and changing roles of family members in order to frame effective marketing mix strategies.	20	CO1
Q2	With the help of suitable examples, analyze the impact of culture and sub-culture on consumer buying behaviour. In the light of the globalization of the Indian economy and market, do you think that the global perspective in understanding the consumer is more suitable than the perspective of cultural meaning? Justify your answer.	20	CO2
Q3	You are planning to buy a digital camera to take along with you on your forthcoming vacation trip. Using the consumer decision making process, evaluate the various stages of the decision process and variables that would influence you while arriving at a purchase decision.	20	CO3

Q4	"The primary task of marketers is to develop/change the attitudes of consumers favorably towards organization/brand." Comment and with relevant arguments, suggest some attitude changing strategies for the following: (a) Doordarshan (b) Vegetarian Diet	20	CO3
	(b) Coursera – Online Courses (d) Shaving for Men		
Q5	A private bank wants to find out how customers evaluate the feature/services provided, usage of internet banking and mobile apps, their satisfaction level with services, mobile apps and employees' responses, and want them to suggest ways to improve services. Design a questionnaire using different types of questions (open ended, close-ended, multiple choice, rating scale, etc.).	20	CO4
Q6	Read the case carefully and answer the questions given at the end. Few brands excite such intense loyalty as that found in the hearts of core Apple buyers. Whether they own a Mac computer, an iPod or even an iPhone, Apple devotees are rock solid in their devotion to the brand. At one end are the quietly satisfied Mac users and at the other extreme are the Mac zealots, sometimes called the Macolytes, people who are highly devoted to Apple products. The chances are good that you know one of the Macolytes, perhaps you are one yourself. These are people who buy all the latest Apple products and accessories to improve their experiences. They virtually live and wait for the next Apple releases. Apple enthusiast see Apple founder Steve Jobs as the Walt Disney of technology. Say the word Apple in front of them and they will start talking excitedly about the superiority of the brand. According to one industry observer, a Mac or an iPhone comes as "not just a machine in a box, it comes with a whole community of fellow believers". The loyal core of Apple users is at the forefront of Apple's recent personal computers resurgence and its burgeoning iPod, iTunes and iPhone empire. What is it that makes Apple buyers so loyal? Why do they buy a Mac instead of an HP or a Dell and an iPhone instead of a Nokia or a Motorola? Ask the true believers and they will simply tell you that Apple's products work much better and do more or that they are simpler to use. But Apple buyer behavior has much	20	CO4

deeper roots. Apple puts top priority on understanding its customers and what makes them tick deep down. It knows that, to Apple buyers, their computer or iPhone is much more than just a piece of electronic equipment. It is a part of their own self-expression and lifestyle - a part of what they are. When you own a Mac, you are anything but mainstream. You are an independent thinker, an innovator, ahead of the crowd.

Apple plays to these deep-seated consumer buying needs and motives in everything it makes and sells. By one account: Apple is the epitome of cool- a company that has gained cult like following because it somehow manages to breathe new life into every category it touches. From sleek laptops to even sleeker phones, Apple products are imaginative, irreverent and pleasing to the eye. They are fun to use and have wreaked havoc on competitors. Apple has shown "a marketing and creative genius with a rare ability to get inside the imagination of consumers and understand what will captivate them", says one analyst. Apple has been "obsessed with Apple users' experience" Apple's obsession with understanding customers and deepening their Apple experience shows in everything that the company does. For example, a visit to an Apple retail store is a lot more than a simple shopping trip. Apple stores are very inviting places. The store design is clean, simple and just oozing with style, much like an Apple iPod or iPhone. These stores invite shoppers to stay a while, use the equipment, and soak up all the exciting new technology.

Apple's keen understanding of consumers and their needs help the brand to build a core segment of enthusiastic disciples. The most recent Consumer satisfaction index in the U.S. gave Apple a market leading Consumer Satisfaction Score of 85- the highest ever recorded for a company in the personal computer industry. Another survey showed that Apple commands the strongest repurchase intent of any personal computer brand -81% of households with an Apple as their primary home personal computer plan to repurchase an Apple. In turn, the consumer love affair with Apple has produced a stunning sales and profit results. Despite the 2008 economic recession, Apple's sales that year soared to a record \$ 32.5 billion, a 35% growth over the previous year and more than four times the sales just four years earlier. In 2009, despite the recession that crippled much of the electronics industry, Apple's iPod and iPhone sales continued to grow at a healthy rate. Last year, the company sold significant units of iPhones and other

products successfully across the globe.

Questions:

- (a) How has a keen understanding of the consumer helped Apple as a company?
- (b) Critically examine the perception that Apple buyers seem to have about Apple products. What in your view, has contributed to such an image in the consumer's mind?
- (c) If you were one of Apple's competitors, what steps would you take to overcome the consumer loyalty to Apple products and get them interested in your product offerings?

ANSWERS
