UNIVERSITY OF PETROLEUM & ENERGY STUDIES End Term Examination (Online) – Jan, 2020

Program: MBA-(IB)
Subject/Course: Quantitative Methods
Course Code: DSQT 7001
Semester: I
Max. Marks: 100
Duration: 3 Hours

Q.No	Section A Choose the Correct Answer in each of the following:	Ma rks	COs
Q1.	On the 17th July, Jatin has Rs. 400,000 savings and decides to spend Rs. 20,000 each year on the anniversary of this date, after how many approximate withdrawals will he have left with Rs. 18,000? He ignores any interest he receives. a) 17 b) 16 c) 18 d) 19	5	CO1
Q2.	Which samples exhibits the consistency? a) 2, 4, 6, 8, 10, 12 b) 2, 2, 3, 11, 12, 12 c) 2, 3, 4, 10, 11, 12 d) 2, 6, 7, 7, 8, 12	5	CO1
Q3.	Suppose a life insurance company sells a Rs. 2, 40,000 one-year term life insurance policy to a 25-year old female for Rs. 2100. The probability that the female survives the year is 0.99592. Find the expected value of this policy for the insurance company. a) Rs. 2100 b) Rs. 239790 c) Rs. 978 d) Rs. 1,122	5	CO1
Q4.	Some test scores follow a normal distribution with a mean 18 and a standard deviation of 6. What proportion of test takers have scored between 12 and 24? a) 22% b) 20 c) 34% d) 68 %	5	CO1

Q5.	A regression analysis between sales (in Rs. 10000) and price (in Rs.) resulted in the following equation: y=40,000-8x The above equation implies that an (a) Increase of Rs. 1in price is associated with a decrease of Rs. 8 in sales (b) Increase of Rs. 8in price is associated with a increase of Rs. 40000 in sales (c) Increase of Rs. 1in price is associated with a decrease of Rs. 32000 in sales (d) decrease of Rs. 1in price is associated with a Increase of Rs. 40000 in sales	5	CO1
Q6.	In the series 2,,, 32 find the missing value for third term a) 19 b) 12 c) 24 d) 27	5	CO1
	Section B		
Q7.	According to Student Monitor, a New Delhi Research firm, the average cumulated college student loan debt for a graduating senior is Rs. 18, 00,000. Assume that the standard deviation of such student loan debt is Rs. 3, 97,880. 30% of these graduating seniors owe more than what amount (what is that minimum amount above with that they can complete their education)?	10	CO2
Q8.	Tickets for a certain show (Opera) bearing numbers from 1 to 100. The odd number tickets were sold by receiving equal Rs. 100 multiple of thrice the number on the ticket while the even number tickets were issued by receiving Rs. 100 multiple to twice the number on the ticket. How much was received by the issuing agency in total if all the tickets were sold until the show begins?	10	CO2
Q9.	Obesity in children is a major concern because it puts them at risk for several serious medical problems. Some researchers believe that a major issue related to this is that children these days spend too much time playing games in their cell phones /watching television and not enough time being active. Based on a sample of boys roughly the same age and height, data were collected regarding hours of involved in electronic gadgets per day and their weight. Compute Pearson's correlation coefficient and indicate whether the correlation is significant. Busy with cell phone game (hrs.) 1.5 5.0 3.5 2.5 4.0 1.0 0.5 Weight in (kg.) 40 55 48 42 50 40 38	10	CO3

OR

Two Friends Adithya Shankar and Ankit Bhatt they joined a reputed domain specific University to pursue their MBA degree (4 semester program). After clearing third semester, When the placement companies came, they both were selected in two different companies with the starting monthly salary of INR 40000/-, but due to different HR policy their yearly increment policy were quite different. Adithya's Company use to give Rs. 10000/- yearly increment whereas Ankit's company has incremental policy of 10% on current salary.

- a) How much salary did each friends received after 15 years?
- b) In which year will Ankit exceed Rs. 80000?
- c) Build/plot a line graph of their monthly salary
- d) In which year does Ankit catch up with Adithya's salary?
