

Enrolment No:

UNIVERSITY OF PETROLEUM AND ENERGY STUDIES

Online End Semester Examination, June 2020

Course: Object Oriented Programming

Semester: II Program: B. Tech. FSE Time 03 hrs.

Course Code: CSEG1008 Max. Marks: 100

SECTION A

- 1. Each Question will carry 5 Marks
- 2. Instruction: Complete the statement / Select the correct answer(s)

S. No.	Question	CO
Q 1	Which of the following is/are not valid control structures?	
	a) Sequence structure	
	b) Redundant structure	
	c) Lop structure	CO1
	d) Selection structure	
Q2	Read the following statements	
	Statement 1: A pointer can be incremented (++) or decremented ()	
	Statement 2: One pointer can be added to another pointer	CO2
	Statement 3: One pointer can be subtracted from another pointer	CO2
	Which of these above statements are True?	
Q3	Fill in the blanks.	
	andoperators cannot be overloaded in C++.	CO1
Q4	Which keyword can be used in template?	
	a) Class	
	b) Typename	CO4
	c) Both class & typename	
	d) Function	
Q5	The wrapping up of data and functions into a single unit is called	
	a) Encapsulation	
	b) Abstraction	CO2
	c) Polymorphism	
	d) Inheritance	
Q6	Which of the following is used to handle the exceptions in C++?	
	a) catch handler	
	b) handler	CO4
	c) exception handler	CO4
	d) throw	

	SECTION B	
	Each question will carry 10 marks	
	Instruction: Write short / brief notes	
S. No.	Question	CO
Q 7	Write a C++ program to print a table of values of the function $y = x^2$ when x varies like 1, 5, 10, 15 to 100 (step size of 5).	CO1
Q28	Does a global function in a C++ program have access to private data member of a class? If yes, please write a C++ statement to demonstrate the access. In no, how can the global function be given access? Also, state other ways to allow access of a function to a private data member of a class.	CO2
Q39	What are pure virtual functions? How are they different from simple virtual functions? Demonstrate the significance of pure virtual functions and abstract base classes with a C++ example. Explain your example code in detail.	CO3
Q10	Can we have more than one destructor and more than one constructor in a single class in C++ program? If yes, please explain with examples.	CO3
	OR What is template? Explain different types of templates. What is the difference between function overloading and template? SECTION C	CO4
1.	Each question will carry 20 marks	
	Instruction: Write long answers.	
S. No.	Question	CO
Q12	What is ISA relationship in context to object oriented programming and how C++ allows the implementation of ISA relationship? What are the different forms/types of inheritances allowed in C++? Discuss with the help of diagrams.	
	OR	
	Differentiate between function overloading and operator overloading with appropriate examples. Suppose you obtained a derived class, D from a base class, B using simple inheritance. The base class B had a function class B{ public: myfunc()	CO3
	The state of the s	Ĩ
	Cout << "I am function in base class" << endl }};
