## UNIVERSITY OF PETROLEUM \& ENERGY STUDIES <br> End Semester Examination (Online) - Dec, 2021

Program: BBA DM
Subject/Course: Research Methodology and Report Writing Course Code: DSRM 2001

Semester: III
Max. Marks: 100
Duration: 3 Hours

| Section-A |  |  |  |
| :---: | :---: | :---: | :---: |
| 1. | What is research report? | 2 | CO1 |
| 2. | Algebraic sum of the deviation of the set of values from their arithmetic mean is. <br> (a) 1 <br> (b) 0 <br> (c) Mean <br> (d) Infinite | 2 | CO1 |
| 3. | Which one of the following is an ideal measure of dispersion. <br> (a) Range <br> (b) Quartile Deviation <br> (c) Mean deviation about Mean <br> (d) Standard Deviation | 2 | CO1 |
| 4. | Absolute zero exist in <br> (a) Nominal scale <br> (b) Ordinal scale <br> (c) Ratio scale <br> (d) Interval scale | 2 | CO1 |
| 5. | What is sampling frame? | 2 | CO1 |
| 6. | What value should r (correlation coefficient) be to have a perfect positive relationship between x and y ? | 2 | CO1 |
| 7. | We review the relevant literature to know: <br> (a) What is already known about the topic <br> (b) What concepts and theories have been applied to the topic <br> (c) Who are the key contributors to the topic <br> (d) All of the above | 2 | CO1 |
| 8. | A sample of 900 items is taken from a population with S.D. 15. The mean of the sample is 25 . Test whether the sample has come from a population with mean 26.8 . Which test should be applied for testing process in this situation? <br> (a) t-test <br> (b) Z-test | 2 | CO 2 |

| (c) $\chi^{2}$ test <br> (d) None of these |  |  |  |  |  |  | 2 | CO 2 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 9. | What is the decision regarding the $\mathrm{H}_{0}$ and $\mathrm{H}_{1}$ when the test statistics value is greater than the critical value? <br> (a) Reject the null hypothesis in favor of the alternative hypothesis <br> (b) Retain/accept the null hypothesis instead of the alternative hypothesis <br> (c) Information is not enough to give any decision <br> (d) None of the above |  |  |  |  |  |  |  |
| 10. | What is the median and mode for the following data: $12,12,23,36,37,45,45,45,45,56$, 56, 67, 78, 90. |  |  |  |  |  | 2 | CO2 |
| Section-B |  |  |  |  |  |  |  |  |
| Q.No | Question |  |  |  |  |  | Marks | COs |
| 11. | Define type-I and type-II error with an example. |  |  |  |  |  | 5 | CO1 |
| 12. | Discuss the difference between correlation and regression. |  |  |  |  |  | 5 | CO2 |
| 13. | Discuss the difference between population and sample. |  |  |  |  |  | 5 | CO 2 |
| 14. | A company administered an intelligence test to all its employees for a long period of time. For all the 80,000 employees, the mean score was found to be 75 and the standard deviation 12. A researcher wishes to study the theory that the top line supervisors of the company are more intelligent than the average. For that, a sample of 50 supervisors is chosen randomly and their mean score is found. To test the theory, what should be the null hypothesis? |  |  |  |  |  | 5 | CO3 |
| Section-C |  |  |  |  |  |  |  |  |
| 15. | Define any four of the following <br> (a) Null Hypothesis <br> (b) Alternative Hypothesis <br> (c) Systematic sampling <br> (d) Cluster sampling <br> (e) Quota sampling <br> (f) Simple random sampling <br> (g) Convenience sampling |  |  |  |  |  | 10 | CO 2 |
| 16. | From the following data, compute | Pear 10 40 | corr 12 41 | on c 14 48 | $\begin{aligned} & \frac{\text { cient }}{} \\ & \hline 15 \\ & \hline 60 \end{aligned}$ | comment on it. | $2.5 * 4=10$ | CO3 |
| 17. | A sample of 400 male students is found to have a mean height 67.47 inches. Can it be reasonably regarded as a sample from a large population with mean height 67.39 inches and standard deviation 1.30 inches? <br> At $5 \%$ level of significance the tabulated value of $\mathrm{Z}= \pm 1.96$. <br> 'OR' |  |  |  |  |  | 10 | CO3 |
