2.	<p>Write the précis of the following text along with apt title:</p> <p>Mental and physical health professionals may consider referring clients and patients to a music therapist for a number of reasons. It seems a particularly good choice for the social worker who is coordinating a client’s case. Music therapists use music to establish a relationship with the patient and to improve the patient’s health, using highly structured musical interactions. Patients and therapists may sing, play instruments, dance, compose, or simply listen to music. The course of training for music therapists is comprehensive. In addition to formal musical and therapy training, music therapists are taught to discern what kinds of interventions will be most beneficial for each individual patient. Because each patient is different and has different goals, the music therapist must be able to understand the patient’s situation and choose the music and activities that will do the most toward helping the patient achieve his or her goals. The referring social worker can help this process by clearly communicating each client’s history. Although patients may develop their musical skills, that is not the main goal of music therapy. Any client who needs particular work on communication or on academic, emotional, and social skills, and who is not responding to traditional therapy, is an excellent candidate for music therapy.</p>
	<p>Section: D</p> <p><i>All Questions are Compulsory.</i></p> <p><i>Each questions carries 25 marks.</i></p>
1.	<p>‘Mind map is an effective way of learning.’ Comment on this statement and Select any of the following cases and explain it with the help of mindmap technique:</p> <ol style="list-style-type: none"> a.
