DECLARATION iii
THESIS COMPLETION CERTIFICATE iv
ACKNOWLEDGEMENTS v
EXECUTIVE SUMMARY vi
TABLE OF CONTENT x
LIST OF FIGURES xii
LIST OF TABLES xiii
ABBREVIATIONS xiv
1. INTRODUCTION 1
1.1 Dehydration and Desalting Process (DDP) 1
1.2 Motivation for the Research 3
1.3 Research Objectives 11
1.4 Content of this thesis 12
2. LITERATURE REVIEW 13
2.1 Emulsion Treating and modelling issues 13
2.2 Modelling capability of ANN and benefits of MS Excel 22
3. MATERIALS AND METHODS 25
3.1 Materials 25
3.2 Methods 25
3.2.1. Research Design 25
3.2.2. Development of the Model 26
3.2.3. Data 45
4. MODEL DESCRIPTION AND APPLICATIONS 47
4.1 Model Description 47
4.2 Modelling Applications 49
4.2.1. Modelling Problem-1: Modelling of DDP to predict SRE and WRE 50
4.2.2. Modelling Problem-2: Modelling of DDP to predict Wash Water flowrate 52
4.3 Simulation and Optimization 54
4.3.1. Simulation 54
4.3.2. Optimization 55
4.4 VP Model linking with other reputed software (like Aspen Hysys) 59

5. RESULTS AND DISCUSSIONS 62
5.1 Background 62
5.2 Modelling Problem-1: Modelling of DDP to predict SRE and WRE 62
5.2.1. Results 63
5.2.2. Conclusions 73
5.3 Modelling Problem-2: Modelling of DDP to predict Wash Water flowrate 74
5.3.1. Results 75
5.3.2. Conclusions 79
5.4 Overall Significance of the Work 79
6. CONCLUSION AND FUTURE WORK 84
6.1 Conclusion 84
6.2 Recommendations for Future work 85
