<b>Certificate from Supervisors .....</b>	<b>ii</b>
<b>Certificate from Scholar .....</b>	<b>iii</b>
<b>Acknowledgements.....</b>	<b>iv</b>
<b>Abstract .....</b>	<b>vii</b>
<b>Table of Contents .....</b>	<b>x</b>
<b>List of Figures.....</b>	<b>xiii</b>
<b>List of Tables .....</b>	<b>xvii</b>
<b>List of Abbreviations .....</b>	<b>xviii</b>
<b>Chapter 1: Introduction.....</b>	<b>1</b>
1.1 Choice of materials in this work- ZnO and BiVO <sub>4</sub> .....	1
1.2 Brief on photocatalytic and photoelectrochemical properties of ZnO and BiVO <sub>4</sub> .....	4
1.3 Features of ZnO .....	6
1.3.1 Crystal structure .....	6
1.3.2 Electrical and optical properties.....	7
1.3.3 Luminescence properties .....	8
1.4 Features of BiVO <sub>4</sub> .....	8
1.4.1 Crystal structure .....	9
1.4.2 Electronic structure and properties.....	11
1.4.3 Optical properties .....	13
1.5 Photoelectrochemical and photocatalytic approach of water splitting through solar energy ..	14
1.5.1 Photo-electrochemical cell for hydrogen generation .....	15
1.5.2 Photocatalysis .....	18
1.6 Issues in solar water splitting .....	20
1.6.1 Material related issues .....	21
1.7 Targets to be achieved in solar water splitting .....	24
1.8 Strategies to improve photo activity of material .....	25
1.8.1 Changing chemical composition.....	25
1.8.2 Altering Physical properties.....	26

1.8.3 Minimizing the recombination of charge carriers .....	26
1.9 Importance of splitting of water for PEC application for hydrogen generation.....	27
1.9.1 Applications of hydrogen .....	28
1.9.2 Problem Statement .....	29
1.9.3 Production of hydrogen .....	33
1.9.4 Hydrogen as energy carrier.....	40
1.10 Importance of water splitting for photocatalytic application for organic pollutant degradation .....	45
1.10.1 Problem Statement .....	46
1.10.2 Consumption of water in textile industry .....	49
1.10.3 Hazards of water pollution.....	50
1.10.4 Classifications of textile wastes .....	51
1.11 Objectives of the present study.....	52
1.12 Organization of the Thesis .....	53
<b>Chapter 2: Synthesis, experimental and characterization.....</b>	<b>54</b>
2.1 Introduction .....	54
2.1.1 Hydrothermal Method .....	56
2.2 Experimental Procedure.....	58
2.2.1 Synthesis.....	58
2.2.2 Chemicals used in sample preparation .....	58
2.2.3 Preparation of nanostructured materials/powder for photocatalysis .....	59
2.2.4 Preparation of photoanodes for PEC .....	61
2.3 Variation in the synthesis conditions .....	62
2.3.1. Growth temperature.....	62
2.3.2. Effect of mechanical milling.....	62
2.3.5. Effect of annealing treatment.....	63
2.4 Characterization.....	63
2.4.1 Photocatalyst powder .....	63
2.4.2 PEC photo anode.....	64
2.5 Computational method for ZnO/BiVO <sub>4</sub> nanocomposite.....	64
2.6 Transmission electron microscopy (TEM).....	64
2.6.1 Specimen preparation .....	65
2.7 X-ray diffraction technique (XRD) .....	66
2.8 X-ray photoelectron spectroscopy (XPS) .....	67
2.9 Photoluminescence spectroscopy .....	68

2.9.1 Time-resolved photo-luminescence (TRPL) .....	69
2.10 Scanning Electron Microscope (SEM) .....	70
<b>Chapter 3: Result and discussion- Photocatalytic and photo-electrochemical study .....</b>	<b>72</b>
3.1 Photocatalysis Study .....	72
3.1.3 Results and Discussion .....	72
3.1.4 Calculations .....	78
3.2 Photo-electrochemical Study.....	82
3.2.2 Result and discussion .....	82
4.2.3 Calculations .....	85
<b>Chapter 4: Study of photocatalytic property of pure and ZnO-BiVO<sub>4</sub> nanocomposites .....</b>	<b>87</b>
4.1 Set-up for photocatalytic study.....	87
4.2 Result and discussion.....	87
4.3 Proposed Mechanism of photocatalysis in ZnO-BiVO <sub>4</sub> nanocomposite.....	91
<b>Chapter 5: Study of photo-electrochemical property of pure and ZnO-BiVO<sub>4</sub> photoanodes .</b>	<b>95</b>
5.1 Set-up for photo-electrochemical study.....	95
5.2 Result and discussion.....	95
5.3 Mechanism of action.....	103
<b>Chapter 6: Summary, Conclusion and Scope for Future Work .....</b>	<b>105</b>
6.1 Summary and conclusion of this study .....	105
6.1.1 Hydrothermal route for pure ZnO and BiVO <sub>4</sub> materials.....	105
6.1.2 ZnO/BiVO <sub>4</sub> nanocomposite for photocatalysis .....	106
6.1.3 ZnO/BiVO <sub>4</sub> photo anode for PEC.....	107
6.2 Scope for future work .....	108
6.3 Future aspects of hydrogen energy .....	108
6.4 Future aspects of water treatment via pollutant degradation .....	110
6.5 Conclusions .....	111
<b>Bibliography .....</b>	<b>113</b>
<b>Publications .....</b>	<b>128</b>
<b>Bio-data .....</b>	<b>130</b>
