**UNIVERSITY OF PETROLEUM AND ENERGY STUDIES**  
**End Semester Examination, December 2018**

|  |                              |
|--|------------------------------|
| <b>Course: Gasification &amp; Gas to Liquid Technology</b> | <b>Semester: V</b>           |
| <b>Programme: B.Tech (APE-GAS)</b>                         | <b>Course Code: PTEG 371</b> |
| <b>Time: 03 hrs.</b>                                       | <b>Max. Marks: 100</b>       |

**Instructions: Assume suitable data if missing. Draw graphs and diagrams wherever necessary.**  
**Start each question in new page.**

**SECTION A**

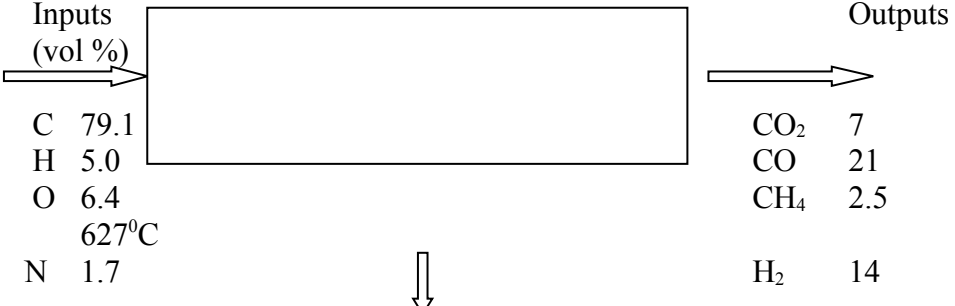

| S. No. | Question   | Marks       | CO  |
|--------|--|-------------|-----|
| Q 1    | Define the following terms<br>a) Pyrolysis b) Oxidation c) Reduction d) Methanation  | 2+2+2<br>+2 | CO1 |
| Q 2    | Explain about Up-Draught biomass gasifier followed by operating conditions.  | 8           | CO4 |
| Q 3    | Demonstrate the open top gasifier with neat sketch and salient features.   | 7           | CO2 |
| Q 4    | Make use of sawdust chemical formula as $CH_{1.35}O_{0.617}$ , estimate the heat of formation of sawdust, the heating value is given as 476 K J/mol. | 7           | CO3 |

**SECTION B**

|     |  |    |     |
|-----|--|----|-----|
| Q 5 | Construct and explain the low-pressure methanol synthesis process with block flow diagram.                                     | 15 | CO3 |
| Q 6 | Distinguish CRIP, Vertical drilling technologies in underground coal gasification along with UCG relationship of gasification. | 15 | CO4 |
| Q 7 | Justify, how sasol technology is feasible for conversion of coal to high yield diesel? Discuss                                 | 15 | CO5 |

**SECTION-C**

|     |  |      |     |
|-----|--|------|-----|
| Q 8 | i) Compare the following F-T synthesis mechanisms with chemical structure<br>a) CO-insertion reaction, b) Enol-reaction<br>ii) List out the names of F-T catalysts and their applications.<br>(OR) | 20+5 | CO4 |
|-----|--|------|-----|

|   |  |  |  |  |    |     |
|---|--|--|--|--|----|-----|
|   | <p style="text-align: center;">Determine material balance of a gasifier for the following composition</p> <div style="text-align: center; margin: 10px 0;"> <p><b>Gasifier</b></p>  </div> <table style="width: 100%; margin: 0 auto;"> <tr> <td style="width: 30%; text-align: left;"> <b>Inputs (vol %)</b><br/>           C 79.1<br/>           H 5.0<br/>           O 6.4<br/>           627°C<br/>           N 1.7         </td> <td style="width: 40%;"></td> <td style="width: 30%; text-align: right;"> <b>Outputs</b><br/>           CO<sub>2</sub> 7<br/>           CO 21<br/>           CH<sub>4</sub> 2.5<br/>           H<sub>2</sub> 14         </td> </tr> </table> | <b>Inputs (vol %)</b><br>C 79.1<br>H 5.0<br>O 6.4<br>627°C<br>N 1.7                      |  | <b>Outputs</b><br>CO <sub>2</sub> 7<br>CO 21<br>CH <sub>4</sub> 2.5<br>H <sub>2</sub> 14 | 25 | CO5 |
