<b>SECTION-D</b>			
Q	Read the following question and answer the following question	50	

	<p>Perhaps the most significant threat to the state or at least to the nation state is the process of globalization. Globalization is broadly, the process through which events and decisions in one part of the world have come to affect people in another part of the world. One manifestation of this is the emergence of a global economy, in which it has become increasingly difficult and perhaps impossible, for a country to regulate the international flow of capital, people and goods. The implications of these developments are dramatic and almost impossible for states to control.</p>
