Q. No.	Section D - Attempt all the questions		
18	B738, Singapore, 2015 On 6 December 2015, a Boeing 737-800 was being maneuvered by tug from its departure gate at Singapore to the position where it was permitted to commence taxiing under its own power when the tug lost control of the aircraft, the tow bar broke and the two collided. The	15	CO4

	<p>Investigation attributed the collision to the way the tug was, used, and, concluded that, the thrust during, and following engine start, was, not a contributory factor. Some inconsistency was, found between procedures for push back of loaded in-service aircraft promulgated by the airline, its ground handling contractor and the airport operator.</p> <p>Analyze the reason for the incident (using safety model) and recommend solutions.</p>		
<p>19</p>	<p>Attempt only one question (either ‘A’ or ‘B’)</p> <p>a) You are working in cargo department of GH organization as Manager. How would you handle and transport the below mentioned shipments</p> <ol style="list-style-type: none"> 1) HUM 2) Pharmaceuticals (PIL) 3) PEM <p>Examine the ways of communication between various other department and downline stations.</p> <p style="text-align: center;">OR</p> <p>b) Analyze the role of GH organization during an airport emergency.</p>	<p>15</p>	<p>CO4</p>
