

ACKNOWLEDGEMENTS

The completion of this work would not be possible without the guidance and continuous pursuance of my supervisor Dr. T. Joji Rao and co-supervisor Dr. Sumeet Gupta. The last five years have greatly changed the way I view at Risk Management and its adoption to the project environment.

I would like to thank my external supervisor Dr. Perihan for her support at all times along with her personal push to complete this Thesis in its present form.

I would like to extend my sincere thanks to Dr. R. Jayaraj for his guidance in carrying out all the statistical analysis. Thanks to Dr. Krishan Kumar Pandey, Dr. Neeraj Anand, Dr. Tarun Dhingra and other staff in UPES for their kind guidance in the process of my research.

A very special gratitude goes out to Mr. Ashok Kamra, General Manager, Toshiba Corporation – Abu Dhabi for providing me the opportunity with carrying out this research. I would also like to extend my sincere thanks to the management team members at Toshiba Corporation – Abu Dhabi office for extending their support by providing expertise guidance. Thanks to my team members and colleagues in providing support during this hardship period by shouldering the burden of getting this thesis in a constructive way.

I would also like to thank all the respondents and to the members who took part in the discussions which outlines the basis for this study.

Thanks to University of Petroleum and Energy Studies and to the Vice-Chancellor and Chancellor for providing me this opportunity for carrying out my PhD degree.

I am grateful to my wife, who has provided me through moral and emotional support in my life. I am also grateful to my other family members and friends who have supported me along the way.

And finally, last but by no means least, also to everyone who had provided their valuable support in one or other form for me during these years.

Thanks for all your encouragement!
